

# COVENTRY HEALTH CARE NATIONAL NETWORK

ACCESS TO CARE WHERE YOU LIVE, WORK AND TRAVEL

**D**octors and hospitals are at the center of your health care experience. It's important that you can get the care you need where and when you need it. Our large national network is made up of over 5,600 hospitals and approximately 550,000 health care providers across the country.\* This means members who live, work or travel outside the local service area can see network doctors anywhere across the country. When you need care, our network gives you options and savings that make the health care experience easier for you.

## THE VALUE IS OUTSTANDING

If you work, live or travel outside of our service area you will have access to providers through the Coventry Health Care National Network. Using a Coventry National Network provider will save you money while ensuring you have access to a comprehensive network when you need a provider outside of your local service area. The Coventry National Network offers the following advantages:

- **Savings:** Just as in our local network service area, the costs of services have already been negotiated. This negotiated rate reduces cost and generally provides you with lower out-of-pocket costs.
- **Access:** Our directly contracted network includes 5,600 hospitals, approximately 550,000 providers and more than 67,000 pharmacies.
- **Quality:** Doctors who participate in the Coventry National Network have met our stringent credentialing requirements and are monitored routinely for consistent quality standards.

## IT'S EASY TO GET CARE FROM A NETWORK PROVIDER

To find a Network Provider, visit our website or call our Customer Service department at the number shown on your ID card.

\*Coventry Health Care National Network provider and hospital counts reported by Coventry Health Care as of January 2012.
